The Playmobil tree house in Diespeck: Playing and learning - naturally!

In summer 2018, the PLAYMOBIL learning tree house opened in the playground of the primary and secondary school in Diespeck. A generous gift from the PLAYMOBIL Foundation for the Promotion of Children, which enables the education and upbringing of children through active as well as creative play and learning.

For about two years now, the children and young people have been allowed to explore, hide and face the challenges of different approaches in the tree house, which is about eleven metres long, fifteen metres wide and six metres high.

The solid wooden construction made of mountain larch is a very special place: to learn directly in nature, to linger comfortably and for creative play. A large room with a surrounding, roofed „balcony“ offers security and shelter for the pupils. Complemented by a long slide bar, a sloping chain walkway and a climbing net, the play area gets its charm from the balanced design and the embedding in the slope amidst bushes and trees. Playing and learning merge here in a symbiosis.
