## Play World Munich-Freiham: Versatile play offer with a special eye-catcher

On a huge green space with old trees in Munich-Freiham, various play areas were created that appeal to all age groups.

The slide hill with the climbing structure perched on top invites daring climbing, balancing and scaling. A few metres further on, in a clearing in the deciduous forest, there is a sand play area that is especially suitable for younger children.

A small „herd of calves“ encourages role play, you can swing gently back and forth or use the hexagonal platform and the triangular platforms to climb and discover. The area with a building site, troughs, pumps and a scooping wheel  
The area with troughs, pumps and scooping wheel focuses on playing with the elements of sand and water - after splashing around, the smaller children can retreat to the three play houses to rest or play with roles. Another area with various swings rounds off the extensive play offer: the oversized partner swing is an aesthetic eye-catcher.
