

The Climbing Forest
- a modular system -

Richter Spielgeräte GmbH

The **original**, for more than 40 years!

The **Climbing Forest** is a modular system made of strong oak trunks and rope climbing connections. The elements may be arranged in a vast number of ways, for example to form a circuit or a swerving path around existing trees. We will design an individual arrangement according to your terrain and the available space.

Concept

- climbing in lofty heights or just above the ground
- climbing trunks and ropes are the basic elements, ideally 'planted' between large living trees.
- For publicly accessible and unsupervised areas. The climbing forest is not a high ropes course. Therefore no helmet, safety belt or supervisory personnel are necessary.

Design characteristics

- individually planned installation with different degrees of difficulty for big and small
- logs from 100 to 200 year-old oak trees in natural growth form, therefore larger variety of height and span width possible
- handcrafted with a clear message: function defines form

Play value

Thanks to its various degrees of difficulty at different heights, the Climbing Forest is a thrilling challenge for children and adults who love to exercise and enjoy testing their strength and capabilities. As the trunks and ropes provide enough space to accommodate large numbers of adventurers at the same time, the Climbing Forest is well suited for heavily frequented playgrounds. Climbing together, moving hand over hand and balancing requires skill and caution. Children improve their motor skills and their ability to assess risks in a playful manner. Encounters on a rocking rope mean that you have to coordinate what you do with the other person.

Having overcome a seemingly impossible obstacle strengthens the children's self-esteem – the proud expression on their faces when they reach the top of the Climbing Forest speaks for itself. The younger and older climbers joyfully experience how concentration and stamina help accomplish great goals.

Suitable

- for children from 6 years and teenagers
- for leisure areas
youth centres
schools
sports grounds
parks

Please find here a small selection of our climbing forest elements:

Spider Net

Horizontal Square Net with Centered Lookout

Coconut Rope with Hand Rope

Horizontal Triangular Net

Horizontal Pentagonal Net with Centered Lookout

Hammock

Balancing Beam with lateral Hand Rope

Nepalese Rope Bridge

Lookout/Rope Ladder

Large Crow's Nest

Tree House incl. 1 trunk

Net Tunnel Ladder

Slides

3-Rope Bridge

Net Tunnel Bridge

Nest Box

Noose Steps

Walk Rope with Hand Rope

Suspension Bridge with Hand Rope

Indian Ladder
